

**AN EXTRAORDINARY
PROVISION FROM AN
EXTRAORDINARY GOD...**
A plan to bring unlimited
funding to the Body of Christ

***What If The Body Of Christ
Had Billions Of Dollars
To Spread The Gospel?***

THE PROVISION FOR THE VISION

America is one of the most prosperous nations in the world, and yet we are under terrible oppression. Unlike third world nations who many times are oppressed by their governments or famine, we suffer from a spiritual oppression. In our country 900,000 teenagers become pregnant every year. There have been 40 million reported abortions since 1973 and 4,000 abortions take place every day. The average child watches 8,000 televised murders and 10,000 acts of violence before finishing elementary school. The rate of teenage murders by classmates in school has risen five times since the Columbine tragedy. 22 million Americans are involved in substance abuse. 2.3 million people are homeless and one million of them are children. Over one million people have worked as prostitutes in the United States. The media bombards our society with worldly thinking and focuses on everything but Christ. These messages of violence, sex and materialism are being perpetuated through funding. That voice is the only one being heard. But what if the Body of Christ had billions of dollars every year to fund alternatives? We believe that the Lord has delivered such a provision.

Kings and Priests Ministries is a non-profit organization whose purpose is to fund the Body of Christ. The founders of Kings and Priests Ministries, Dennis Lee and wife Alison, are also the owners of Better World Technologies, an alternative energy company. This company is soon expected to be the largest residential electricity supplier in America and have annual revenues of billions of dollars every year. They have pledged to donate ALL of the profits made to the Body of Christ for the purpose of putting God back at the center of our country and to fund world-wide evangelism. These technologies could create 100% clean energy and could eliminate the need for fossil fuels entirely! The technologies were demonstrated, tested and proven on two nationwide tours in 1999 and 2001. The plan is to enroll 1.6 million Americans to witness the finished technologies at public demonstrations and be a host site for the generators. These witnesses would receive all of their electricity for free. In addition, all witnesses at the demonstrations will be allowed to set nine of their friends and relatives free of their electric bills, possibly forever. Each generator could produce 14 times the power that the average home would use. That excess electricity will be sold over the utility grid. Hundreds of thousands have already enrolled. Ultimately 16 million American homes will be provided their energy 100% pollution free! Each one of the units would be producing large revenues, and 100% of those revenues have been pledged to support Christian programs!

The funds that this project could generate could be used to create Christian programming on network television. To create messages about salvation instead of commercials. To produce Christian movies with well known celebrities. We could provide women considering abortion with the funding to go to college and the emotional support to endure. We could create free drug rehabilitation centers to share the message of Christ with those addicted to drugs. We could create programs to assist the homeless and those in prostitution to place them in jobs, or pay for them to get the training that they need to start a career. But the most important thing that we can offer our country men who are in spiritual bondage is their freedom. The message that Christ has set them free. It's time for us to stop cursing the darkness and simply shine the light. The time has come for the Lord to redeem America. We believe that this is the provision for the vision. Please visit us on the web, and watch our short video. To participate in this ministry you can enroll yourself as a witness and not only get all of your electricity for free possibly for life, but that act could possibly generate \$50,000 a year in profits, that can be used to fund programs that instill Christian values in our society.
